# Materials Science and Engineering MSMSE

Together, the [Graduate Student Handbook](#) and your graduate program handbook should serve as your main guide throughout your graduate career. The Graduate Student Handbook includes university information, policies, requirements and guidance for all graduate students. Your program handbook describes the details about graduate study and requirements in your specific program. While both of these handbooks are wonderful resources, know that you are always welcome to talk with faculty and staff in your program and in the Graduate College.

The central activities and missions of a university rest upon the fundamental assumption that all members of the university community conduct themselves in accordance with a strict adherence to academic and scholarly integrity. As a graduate student and member of the university community, you are expected to display the highest standards of academic and personal integrity.

Here are some resources to help you better understand your responsibilities:

- [Academic Honesty](#)
- [Academic Integrity Training](#) - Open to all graduate students at no cost
- [Plagiarism](#)

## Introduction

The objective of this Handbook is to help students understand the process of completing a graduate education at UCF, provide information on resources that will help them develop academically and professionally, and to clearly define the responsibilities of the student to complete the degree program. The Handbook will also serve as a reference tool to guide graduate students through their graduate program and help students stay on track for degree completion. It will also help faculty and staff to better guide those students.

## Advising and Mentoring

Advising and mentoring are two of the greatest elements that bring success to a Master's student's career. The faculty advisor is a very important person in the life of a graduate student. The faculty advisor will, mostly likely, end up being the student's thesis committee chair. The Graduate Coordinator, however, will provide initial guidance new students on overall academic requirements and the program and university policies and procedures, while the faculty advisor serves as the primary mentor providing direction on research, advice on plan of study, and guidance on other areas of academic and personal life.

### Roles and Responsibilities:

- Faculty Advisor
  - The advisor helps the student select which courses to take.
  - The advisor (in consultation with the student) develops the student's plan of study
  - The advisor directs the student's research
  - The advisor reviews and approves the student's thesis or dissertation
  - The advisor often provides financial support for the student (based upon a research contract)
- Student
  - The student takes coursework as required, maintaining a minimum 3.0 GPA
  - The student maintains a full course load and works diligently to complete all requirements in a timely manner
  - The student (in consultation with the faculty advisor) develops a plan of study prior to completing the first 9 hours of coursework

- It is the student's responsibility to keep informed of all rules, regulations, and procedures required for graduate studies. Graduate program regulations will not be waived or exceptions granted because students plead ignorance of the regulations or claim failure of the adviser to keep them informed.

The process in which a student should obtain a faculty advisor is by contacting the various Materials Science and Engineering faculty and seeing where there is a common research interest. It is entirely the responsibility of the student to find an advisor. The student should do so within the first few weeks of their studies here at UCF. When there is no formal advisor, the Graduate Coordinator can serve as the default academic advisor.

The student-advisor relationship is a very important one for both parties and it is in their best interests to maintain this relationship and communicate openly. In those rare cases when either party desires a change, it is recommended that the need for a change be discussed with the program Graduate Coordinator.

## Plan of Study

The plan of study serves as an agreement between the student and the program, listing all courses necessary for completing degree requirements. Students, with their advisor, decide on a course of study for meeting the degree requirements and complete the plan of study form. The plan of study will then serve as a guide for the student to follow and also serve as a reference tool for the MSE program to track the academic progress of the student.

The plan of study form is located on the MSE website. This form should be prepared and signed by the adviser and student, then given to the graduate program assistant for review, MSMSE Program Coordinator's approval, College approval and filing in the student's permanent file. It must comply with the student's relevant catalog. Plans of study for students seeking a Master's degree should be on file by completion of the initial 9 hours of graduate coursework. The student and his/her advisory committee may make changes in the plan of study at any time with approval of the graduate program director. However, once established, the plan of study cannot be altered solely due to poor academic performance of the student. All Master's students must maintain a minimum of 3.0 GPA for their graduate studies at UCF and on their plan of study coursework. If a student, with the agreement of their faculty advisor, wishes to make changes on their plan of study, they must follow the same process as submitting an initial plan of study. All signatures must be obtained again and the updated plan of study on file with the College.

## Incomplete Grades

A grade of "I" (incomplete) may be assigned by the instructor when a student is unable to complete a course due to extenuating circumstances, and when all requirements can clearly be completed in a short period of time following the close of regular classes. In all circumstances where an "I" grade is received, the student and faculty member must complete an agreement form that specifies how and when the incomplete grade will be made up. This agreement form is submitted with the instructor's grade rolls at the end of the semester, and a copy of this agreement is given to the college for further follow-up. For those students on financial assistance such as loans, the incomplete (I) must be made up by the agreement date. Failure to complete the agreed upon course requirements by the agreement date may result in the assignment of an "F" grade, or a "U" grade for thesis, dissertation, or research report hours. It is the student's responsibility to arrange with the instructor for the change of the "I" grade when the course requirements have been met.

All grades of "I" must be resolved within one calendar year or prior to graduation, whichever comes first. Incompletes in regular course work left unresolved will be changed to "F" if not changed in the allowed time period, and this time period may be sooner for those receiving financial assistance. The exception to this is enrollment in thesis (EMA 6971) and dissertation (EMA 7980) hours where the incomplete grade will be allowed to continue until graduation. UCF fellowship students cannot receive fellowship funds while holding incomplete

grades and have thirty days from the issuance of the Incomplete to remedy it in order to continue to receive fellowship funds.

## **Graduation**

Graduation is the culmination of a challenging and arduous journey in the pursuit of a higher degree. To get to this pinnacle, it takes dedication, sacrifice, and hard work (and meeting all the bureaucratic processes and deadlines of UCF). In order to eliminate or reduce the potential for any unnecessary delays or complications with graduation, each student must be aware of and comply with all degree requirements and deadlines, and must submit all necessary forms on time.

## **Forms and Deadlines**

The following three documents are needed when applying to graduate: Intent to Graduate Form, Graduate Exit Survey, Final Plan of Study. They are to be submitted to the MSMSE program assistant by the end of the semester PRIOR to the semester of graduation. For example, if a student is planning on graduating in Spring of a given year then those forms are due by the end of the preceding Fall semester. The forms can be found online or from the Academic Affairs office for the College of Engineering in ENG 1- Room 107. The final plan of study should be a typed, final document indicating every class that has been taken to satisfy the Master's requirements.

## **Overview of Important General Graduate Policies**

### **Student Responsibility to Keep Informed**

It is the student's responsibility to keep informed of all rules, regulations, and procedures required for graduate studies. Graduate program regulations will not be waived or exceptions granted because students plead ignorance of the regulations or claim failure of the adviser to keep them informed.

### **Definition of Formal Course Work**

Formal courses – Existing UCF courses that involve standard class instruction of a defined body of disciplinary knowledge. These courses involve interactions between a formal course instructor and the students that make up the class, and can be traditional, face-to-face courses, web courses, and media-enhanced courses. Such classes include both core/required courses as well as elective courses, seminar courses and independent study courses (EMA 6908), but are distinguished from the various categories of individualized research and scholarly courses.

Independent Study (EMA 6908) – A course of study created outside of the standard-format formal courses offered by the university. Independent Study must have a formally defined core of knowledge to be learned by the student(s). The core of knowledge to be learned by the student(s) must be specified in written form and approved by the student(s), the instructor, and the program coordinator prior to enrollment in Independent Study.

### **Definition of Research and Scholarly Work**

Directed Research (EMA 6918) – Graduate-level research/scholarly work. Research hours taken at the graduate level. These can include laboratory rotations in addition to standard research and scholarly endeavors directed toward completion of a project.

Master's Thesis (EMA 6971) – Research or scholarly hours taken and directed toward completion of a thesis.

### **Full-time Enrollment Requirements**

A full-time, degree-seeking, graduate student must take at least 9 credit hours in the fall and spring semesters. A half-time load is defined as enrolled in at least 4.5 credit hours in fall and spring terms. During the summer term,

full-time is 6 credit hours and half-time is 3 credit hours. Graduate students receiving assistantships, tuition support, and fellowships must be enrolled full-time as degree-seeking students and maintain good academic progress. For Master's students who have completed all course requirements and are registered for Master's Thesis (EMA 6971) hours only, full-time is 3 hours per semester until graduation. Such students must continue to enroll in at least three thesis hours each semester (including summers, without skipping a semester) until they successfully complete the thesis defense and graduate. Students who wish to enroll in part-time hours should consult their adviser.

### **Review of Academic Performance**

The primary responsibility for monitoring academic performance standards rests with the degree program. However, the academic college and the UCF College of Graduate Studies will monitor a student's progress and may dismiss any student if performance standards or academic progress as specified by the program, college or university are not maintained. Satisfactory academic performance in a program includes maintaining at least a 3.0 graduate status GPA (defined below) in all graduate work taken since admission into the program. Satisfactory performance also involves maintaining the standards of academic progress and professional integrity expected in a particular discipline or program. Failure to maintain these standards may result in dismissal of the student from the program. For more details on the process of academic probation and dismissal governed by the College of Graduate Studies, check out these Academic Performance Policies.

### **Continuous Attendance**

Failure to enroll in three consecutive semesters (spring, summer, fall) is considered non-continuous enrollment. Students are expected to maintain enrollment and to complete their graduate study expeditiously. A Special Leave of Absence should be requested when students anticipate they will not be enrolled for three consecutive semesters or more. If students are not enrolled in the university for a period of three consecutive semesters (spring, summer, fall) and do not obtain Special Leave of Absence approval for such interruptions in their plans of study, they will be discontinued and must reapply for admission. Readmission is not guaranteed.

All (domestic and international) students taking thesis or dissertation hours are required to be continuously enrolled (including summer) until the thesis or dissertation is completed.

Because of U.S. government regulations, international students must be enrolled every fall and spring semester. For students in this category, Special Leave of Absence is only available for documented medical reasons.

A student without an approved Leave of Absence who breaks continuous enrollment will lose the option of fulfilling the degree requirements originally listed in his/her official plan of study already on file, and will instead fulfill the degree requirements listed in the graduate catalog in effect at the time the student resumes his/her attendance.

### **Reminder to International Students Regarding Employment**

According to U.S. Citizenship and Immigration Services (USCIS) regulations, graduate students who are on an F1 or J-1 visa may accept employment on campus without prior USCIS approval as long as students are enrolled full-time and employment does not interfere with their studies.

Graduate students who desire to engage in off-campus employment must be approved by the International Services Center (ISC) for Curricular Practical Training (CPT) prior to beginning the employment. CPT is defined as employment that is an integral part of the established curriculum and can be in the form of an internship or cooperative educational experience. In order to qualify for CPT, there are several requirements that must be met. Please speak with an adviser at the ISC for more information on these requirements and prior to engaging in **off campus** employment.

During the fall and spring semesters, on-campus employment is limited to no more than 20 hours per week while school is in session. During the summer enrollment periods, on-campus employment is limited to no more than 30 hours per week for students who are enrolled full-time as graduate assistants. Such employment may be up to 40

hours per week during the summer if students are not enrolled full-time as graduate assistants. (Please note that all graduate assistants during the summer must enroll in a full-time course load.) Employment may also be up to 40 hours per week during vacation or other break periods. Please speak with an adviser at the ISC for clarification of these policies.

On-campus employment is not permitted after completion of the plan of study, unless the student is issued a Form I-20A-B to begin a new program and intends to enroll in the next regular academic term or session.

Students who received a bachelor's degree at one school and will start a master's degree or Master's at UCF are eligible to work during the summer at UCF as long as a Form I-20A-B was issued for the new master's or Master's program.

International students on an F-1 visa are eligible to apply for one year of optional practical training (OPT) after completion of their program.

For more information about the employment of international students, contact the International Services Center at 407-823-2337 or visit the office to speak with an adviser.

## Materials Science and Engineering Program Policies

The primary objective of Master's work is to educate students to a point of excellence in conducting, disseminating, and applying scholarly research, with the explicit goal of making original, substantive contributions to their degree discipline. The advanced nature of Master's education requires student participation, debate, evaluation, and discussion of diverse ideas and approaches. Careful analysis, independent research, and greater understanding and application of ideas are also expected.

The Master's degree program requirements will consist of required and elective courses. It may also consist of seminars, directed research, independent study, and thesis research.

- Each Master's plan of study will include a minimum of 30 semester hours of graduate credit beyond the baccalaureate degree. These graduate credits must be taken as part of an approved graduate plan of study.
- All graduate credit in a Master's program must be at 5000 level or higher.
- At least one-half of the credit hours used to meet program requirements must be in 6000-level courses, including the allowed number of research and thesis hours.
- A minimum of 24 credit hours must be considered formal coursework
- Only graduate-level credit with a grade of "C-" or higher may be used to satisfy degree requirements.
- A university-wide minimum of at least 6 hours of thesis credits is required for all thesis Master's programs. Students choosing the non-thesis option must take **EMA 6085 Research Methods in Materials Science and Engineering** to establish their ability to integrate their learning and to demonstrate independent thinking. Alternatively, non-thesis student may take **EMA 6918 Directed Research**, in which case the instructor for that is required to provide a letter confirming the student's integration of knowledge and independent thinking.

### Time Limitation and Continuous Enrollment

The student has seven years from the date of admission to the Master's program to complete the dissertation and complete the Master's degree. No courses used in a plan of study can be older than seven years at the time of graduation. There is no time limitation for waived or transferred hours from a completed master's degree used toward a Master's degree.

Students who anticipate being out for an extended period of three consecutive semesters or longer should apply for a Special Leave of Absence. Students who do not maintain continuous enrollment without a Special Leave of Absence (see Continuous Attendance and Special Leave of Absence in the General Graduate Policies) must file for readmission to the university, although seven years is measured from when the student was first admitted to the program.

## Transfer Credits

Graduate transfer credits consist of hours completed at a regionally accredited institution (including UCF) or recognized international institution. Hours are eligible for transfer only if they meet the following criteria:

- Only graduate-level or higher courses may be accepted as transfer credits.
- Only courses with a grade of "B-" or higher may be transferred into a plan of study.
- Only hours that are no more than seven years old may be transferred, unless part of an earned graduate degree.
- Only formal course work hours, not thesis or research hours, may be accepted as transfer credits.

The acceptance of transfer credits must be approved by the MSMSE Program Coordinator. Students should be aware that transfers are not allowed in the semester that the student wishes to graduate.

## Curriculum

Please visit the [Graduate Catalog](#) to see the current curriculum for our program.

## Timeline for Completion

### Optional Timeline for Students with Materials Background

#### 1st Year of Graduate Training

<b>Fall</b>	<b>Spring</b>	<b>Summer</b>
<ul style="list-style-type: none"><li>• EMA 5106 Metallurgical Thermodynamics (3 hours)</li><li>• Required Pair Course (3 Hours)</li><li>• Elective (3 Hours)</li></ul>	<ul style="list-style-type: none"><li>• EMA 5317 Materials Kinetics (3 hours)</li><li>• Required Pair Course (3 hours)</li><li>• Elective (3 hours)</li></ul>	<ul style="list-style-type: none"><li>• Electives, optional</li></ul>
Semester Total: 9 credit hours	Semester Total: 9 credit hours	

#### 2nd Year of Graduate Training

<b>Fall</b>	<b>Spring</b>
<ul style="list-style-type: none"><li>• EMA 6058 Research Methods in MSE or EMA 6918 Directed Research (Non-thesis Option) or EMA 6971 Thesis (Thesis Option)(3 hours)</li><li>• Elective (3 hours)</li><li>• Electives (3 hours)</li></ul>	<ul style="list-style-type: none"><li>• Electives or EMA 6971 Thesis (3 hours)</li></ul>
Semester Total: 9 credit hours	Semester Total: 3 credit hours

## Optional Timeline for Students without a Materials Background

### 1 Year of Graduate Training

Fall	Spring	Summer
<ul style="list-style-type: none"><li>• EMA 5104 Intermediate Structure and Properties of Materials (3 hours)</li><li>• EMA 5106 Metallurgical Thermodynamics (3 hours)</li><li>• Required Pair Course(3 hours)</li></ul>	<ul style="list-style-type: none"><li>• EMA 5317 Materials Kinetics (3 hours)</li><li>• Required Pair Course (3 Hours)</li><li>• Elective (3 hours)</li></ul>	<ul style="list-style-type: none"><li>• Electives, Optional</li></ul>
Semester Total: 9 credit hours	Semester Total: 9 credit hours	

### 2 Year of Graduate Training

Fall	Spring
<ul style="list-style-type: none"><li>• EMA 6058 Research Methods in MSE or EMA 6918 Directed Research (Non-thesis Option) or EMA 6971 Thesis (Thesis Option)(3 hours)</li><li>• Elective (3 hours)</li><li>• Electives (3 hours)</li></ul>	<ul style="list-style-type: none"><li>• Electives or EMA 6971 Thesis (3 hours)</li></ul>
Semester Total: 9 credit hours	Semester Total: 3 credit hours

## Thesis Requirements

**A thesis is optional for this program; the following information is intended for those choosing to complete a thesis.**

A Masters student's thesis may be among their biggest academic efforts that they ever make. It is highly recommended for a student to discuss format and content with their advisor, and to peruse other theses or dissertations before getting started.

### University Dissertation Requirements

The College of Graduate Studies [Thesis and Dissertation page](#) contains information on the university's requirements for dissertation formatting, format review, defenses, final submission, and more. A step-by-step completion guide is also available on [Thesis and Dissertation Services](#) Site.

All university deadlines are listed in the [Academic Calendar](#). Your program or college may have other earlier deadlines; please check with your program and college staff for additional deadlines.

**The following requirements must be met by dissertation students in their final term:**

- Submit a properly formatted file for initial format review by the format review deadline
- Submit the Thesis and Dissertation Release Option form well before the defense
- Defend by the defense deadline
- Receive format approval (if not granted upon initial review)

- Submit signed approval form by final submission deadline
- Submit final dissertation document by final submission deadline

Students must format their dissertation according to the standards outlined in [Thesis and Dissertation Webcourse](#). Formatting questions or issues can be submitted to the Format Help page in the [Thesis and Dissertation Services](#) site. Format reviews and final submission must be completed in the [Thesis and Dissertation Services](#) site. The Dissertation Approval Form is also available in the Thesis and Dissertation Services site.

The College of Graduate Studies offers several thesis and dissertation [Workshops](#) each term. Students are highly encouraged to attend these workshops early in the dissertation process to fully understand the above policies and procedures.

The College of Graduate Studies thesis and dissertation office is best reached by email at [editor@ucf.edu](mailto:editor@ucf.edu).

## Thesis Advisory Committee Membership (For Thesis Option)

Masters students must have a Thesis Advisory Committee prior to registering for Thesis hours. The Committee must consist of a minimum of three members: two must be faculty members of the graduate program faculty approved to direct thesis, one of whom is qualified to serve as Chair, and one must be at large from outside the degree program.

The “outside” faculty member of a committee must be approved by the Graduate College and these faculty are listed as either Full or Associate Graduate Faculty or as a Graduate Faculty Scholar in the Graduate Catalog. The committee Chair must be a member of the graduate faculty approved to direct thesis or dissertations for the MSE program. Adjunct faculty and off-campus experts that are Graduate Faculty Scholars may serve as the outside-the-program person in the committee. The College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser. Associate and Full Graduate Faculty members must form the majority of any given committee. Additional information regarding the criteria for serving as a member, co-chair, or chair of a Dissertation Advisory Committee is provided in the updated [Graduate Faculty policy](#).

Committee membership must be approved by the Program Coordinator and submitted to the College of Graduate Studies. All members must have expertise in fields related to the dissertation topic. The UCF College of Graduate Studies reserves the right to review appointments to a thesis advisory committee, place a representative on any thesis advisory committee, or appoint a co-chair. A student may request a change in membership of the thesis advisory committee with the approval of the program director and re-submission to the College of Graduate Studies.

In unusual cases, with approval from the department Chair, a professor may serve as a co-chair of a committee. Joint faculty members may serve as committee chairs, but off-campus experts and adjunct faculty may not serve as committee chairs.

All members vote on acceptance or rejection of the final thesis. The final thesis must be approved by a majority of the advisory committee.

## Responsibilities of Members of Masters Advisory Committees

See [Graduate Faculty policy](#).

Responsibilities of all members of Masters advisory committees:

- To meet at regular intervals at least once per year to: (i) discuss and approve the proposed thesis research and the plans for carrying out research; and (ii) to assess progress toward the thesis and give the student a yearly letter of evaluation in addition to S/U grades awarded for 6971 courses.

- To review Turnitin.com results from thesis submittals.
- To participate in the thesis defense to assure: (i) that the dissertation is acceptable as original research and a contribution to the discipline; and (ii) that it meets the standards of the university. No fewer than three faculty members, including all members of the advisory committee, shall be present with the student during the examination. Only members of the advisory committee may sign the thesis, and a majority must approve of the thesis. The thesis defense must be conducted on campus, unless there is an accepted joint degree program with another university that specifies a different arrangement that has been approved by the university.

Responsibilities of the chair (and co-chair) of Masters advisory committees:

- In cooperation with the program director, to review the plan of study, the research, and all other degree requirements by meeting with the student early in the program and immediately after appointment as chair/co-chair.
- To suggest to the student possible committee members who could serve on the advisory committee. To establish timelines for the research, set expectations, and evaluate the student progress based upon these.
- To meet at regular intervals with the student to discuss the proposed thesis research and the plans for carrying out research.
- To review in a timely manner all written materials submitted by students and offer suggested revisions.
- To meet once per year with the student and the thesis advisory committee to assess progress towards the thesis and give the student a yearly letter of evaluation in addition to S/U grades awarded for 7980 courses. The chair shall write this letter and send it to the program director and the College of Graduate Studies after consultation with the advisory committee.
- To coordinate the ongoing efforts of the committee as its chair, and to participate fully in the responsibilities of the committee members as a member of the advisory committee.
- To chair the thesis defense, ensure its proper conduct as described above, and submit to the program director for the student's records all necessary grades, forms and other materials.

Responsibilities of the external committee member of a dissertation advisory committee:

- External committee membership will entail the full responsibilities of other committee membership
- External committee members should bring specific disciplinary knowledge or research expertise to the committee.
- External committee members may be appointed from outside of the university or outside of the college (if the committee is for a college-wide program). The external committee member may not be affiliated in any way with the department of the committee, such as through joint or secondary joint appointments.
- External members must be approved as Graduate Faculty Scholars prior to inclusion in thesis advisory committee membership.

It is the responsibility of the student, with agreement from their committee members, to schedule the date, time and location of their thesis defense. There are room reservation programs available online, which can be used to schedule a classroom and/or conference room on campus. The student can seek the assistance of the MSE program assistant if they need assistance with scheduling the room facilities.

## **Enrollment in Thesis Hours**

The university requires all Master's students to take a minimum of 6 credit hours of Master's thesis hours. There is also current MSE program policy. Thesis research is considered to be a full-time effort, and enrollment in at least three Master's thesis (EMA 6971) credit hours constitutes full-time graduate status. Masters students who have begun taking Master's thesis hours (EMA 6971) must enroll in at least three dissertation hours each

semester (including summers, without skipping a semester) and continue doing so until they complete the dissertation and graduate. Students wishing to enroll in part-time hours should consult with their adviser.

## **Thesis Defense**

### **Scheduling a Room**

It is the student's responsibility to schedule a room for their Masters defense. They must make sure that it can seat all who may be in attendance and is equipped with all the necessary media capabilities that would be required for their defense presentation. [Room reservation](#) assistance is available online through the College of Engineering. Students may also speak with the program assistant if needing guidance regarding choosing a room for their defense. Students must make sure to reserve the room well in advance of their defense date to ensure a quality location.

### **Defense Announcement**

All students, upon agreement and approval from the dissertation chair/faculty advisor, must supply a defense announcement TWO WEEKS prior to their defense date, as it will be posted on the College of Engineering website. The defense announcement should include the following information: date, time, location, committee member names, dissertation title, abstract and that the defense is open to the public. Below is an example of a well-formatted defense announcement.

### **Committee Members Present**

To participate in the thesis prospectus examination, the entire committee shall be simultaneously present for the oral part of the examination and subsequent meeting of the committee. In the event of unusual circumstances, any distance participation by a committee member (i.e. video conferencing) requires prior approval of the program coordinator and the Associate Dean of the College of Engineering and Computer Science. The defense shall be conducted on campus, unless there is an accepted joint degree program with another university that specifies a different arrangement that has been approved by the university.

### **Paperwork/Forms Completed During Defense**

Prior to every defense, the program assistant will organize all necessary paperwork that needs to be completed by committee chair and all other committee members during the student's Master's defense. It is the responsibility of the student to pick up these forms, have them filled out by the appropriate members, and submitted back to the program assistant for filing.

## **Graduate Research**

Research is a vital part of graduate education, particularly for Master's students. The development of research skills and the practice of good research ethics begin with graduate study. Faculty serve a crucial role and are the primary source for teaching research skills and modeling research ethics.

- In the Materials Science and Engineering program, much of our research is carried out as a part of contracted sponsored research. Faculty obtain sponsored research from many different government agencies, and/or industry, and thus commit the university to doing certain research tasks. Students are typically hired to help the faculty conduct the research, and as such are contractually obligated to give their "best efforts" to accomplishing the research tasks. In most cases, students who are supported on contracts may use the results of their work as the basis for their thesis or dissertation.

- It is important to be honest and ethical in conducting research as well as in taking classes. Report all data factually and completely. Please see the Graduate Catalog for policies pertaining to [Academic Behavior Standards](#).
- Patents and inventions may arise from the faculty and graduate student research. UCF has clear guidelines and a [Patent Invention Policy](#) detailed in the UCF Graduate Catalog.
- There are specific Laboratory Safety Procedures that must be followed by each student working in a lab. It is the program policy that each student is responsible for knowing and following the Safety Procedures. Please see the laboratories manager and/or your faculty advisor to get a copy of the Safety Procedures for the appropriate lab.

## Financial Support

Financial support is a major concern for graduate students, especially since many rely on financial support from the University to pursue graduate study. In combination, the College, the University, and the Department provide financial assistance to graduate students in several ways: (1) fellowships and scholarships are available to academically outstanding students, (2) Graduate Teaching Assistantships – GTA's (for grading or for lab teaching) are available in limited numbers, (3) Graduate Research Assistantships – GRA's (for assisting faculty with research) are more widely available in the MSMSE program and depend on the research funding available to individual faculty.

## Assistantships

All students are expected to maintain a 3.0 GPA in their Plan of Study. They must not make any more than two 'C' grades, and those must be balanced with two 'A' grades. Students on contract are expected to work 10 to 20 hours per week on their assigned tasks (whether it be grading, lab teaching, or research), while they are maintaining satisfactory progress in completing their academic courses.

Students must meet their obligations to continue to receive their financial support. If the students are on time cards, the cards must be filled out properly and filed on time. If they are on contract, they must maintain satisfactory work as defined by their supervisor. Also, being on contract requires that the students register for the proper number of hours of classes in time to process tuition waivers and to meet other academic requirements.

The duration of financial support may vary from one academic year at a time to up to a 4-year renewable fellowship.

International students are expected to be here as full-time students, and may not work off campus except under very strict conditions. For more information regarding [international student employment](#), please see the Graduate Catalog.

## Tuition Support and Health Insurance

Tuition support and student health insurance correspond with a student's assistantship. If a student is working full-time (20 hours/week) as a Graduate Research Assistant (GRA) or a Graduate Teaching Assistant (GTA), they automatically qualify for health insurance and for re-classification as "in-state" for tuition purposes and the academic portion of their in-state tuition will either be waived (if GTA) or paid on their behalf by their research advisor (if GRA). [Tuition remission information](#) along with frequently asked questions concerning tuition waivers can be found on the College of Graduate Studies website. Information regarding paid [health insurance coverage](#) for qualifying graduate assistantship and university fellowship students can also be located on the College of Graduate Studies website.

## Important Contacts

International Services Center, [global.ucf.edu/](http://global.ucf.edu/)

Financial Aid, [finaid.ucf.edu/](http://finaid.ucf.edu/)

UCF Graduate Catalog, [catalog.ucf.edu/index.php?catoid=4](http://catalog.ucf.edu/index.php?catoid=4)

## Graduate Student Associations

### Graduate Student Association

The Graduate Student Association (GSA) is UCF's graduate organization committed to enrich graduate students' personal, educational and professional experience. To learn more or get involved, please visit [facebook.com/groups/UCFgsa/](https://facebook.com/groups/UCFgsa/). For individual department or graduate program organizations, please see program advisor.

[American Society of Materials International \(ASM\)](#) disseminates technical information related to materials science and engineering, and enhances the professional preparation of members through information-sharing and interaction among members in forums and meetings, routine chapter activities and publications.

[Materials Research Society \(MRS\)](#) exposes students to materials research and publicity of UCF in a global materials research environment.

[Students for the Exploration and Development of Space \(SEDS\)](#) promotes space exploration and the drive to become a space fairing civilization by providing members with experience on real life projects.

[The Florida Engineering Society](#) prepares engineering students of all disciplines for the high level of performance and responsibility that is required to succeed in today's job market, while providing the opportunity to develop professional relationships with professional engineers, educators and peers.

[National Society of Black Engineers \(NSBE\)](#) strives to increase the number of culturally responsible black engineers who excel academically, succeed professionally, and positively impact the community.

[Society of Hispanic Professional Engineers \(SHPE\)](#) promotes the development of Hispanics in engineering, science and other technical professions.

[Society of Women Engineers \(SWE\)](#) is a useful resource for women in technical fields including engineering.

[Student Panel for Engineering and Computer Science](#) promotes student interests and achievements within the College and to the technical community at-large, serving as an advisory board to the Dean of the College of Engineering and Computer Science and as a coordinating body for college-wide events.

[Theta Tau Professional Engineering Fraternity](#) develops and maintains a high standard of professional interest among its members.

## Professional Development

Professional development opportunities in this discipline are available through research, clinical experiences and participation in student professional organizations.

In this section, we identify university resources available to students for professional development. A graduate student's professional development goes beyond completing course work, passing exams, conducting research for a thesis or dissertation, and meeting degree requirements. Professional development also involves developing the academic and non-academic skills needed to become successful in the field of choice. UCF has an active professional development program for graduate students, including the following programs:

- Preparing Tomorrow's Faculty Program, sponsored by Faculty Center for Teaching and Learning
  - This certificate program (12-weeks) consists of group and individualized instruction by Faculty Center staff and experienced UCF professors. Textbooks and materials are provided.
- Career Services and Experiential Learning
- Pathways to Success Workshops
- Graduate Research forum, sponsored by the College of Graduate Studies and Graduate Student Association
- Facilitate summer internships for graduate students and inform students of such opportunities.
- The following are Graduate Awards of Excellence programs:
  - Award for Excellence by a Graduate Teaching Assistant
  - Award for Excellence in Graduate Student Teaching
  - Award for the Outstanding Master's Thesis

Students have many opportunities to further their careers while pursuing graduate work here at the university. While working with faculty advisors, they are able to present papers and posters at various conferences, develop their grant writing skills while assisting with proposals and gain notoriety through their publications.

## Job Search

For specific services or resources provided by the academic program, please visit the [Department of Materials Science and Engineering website](#).

**UCF's Career Services** department offers a wide range of programs and services designed to assist graduate students. These services include evaluation and exploration of career goals, preparation for the job search and job search resources. To learn more, visit their website at [career.ucf.edu/](http://career.ucf.edu/).

## Forms

- [College of Graduate Studies Forms and References](#)  
A complete listing of general forms and references for graduate students, with direct links, may be found here.
- [Graduate Petition Form](#)  
When unusual situations arise, petitions for exceptions to policy may be requested by the student. Depending on the type of appeal, the student should contact his/her program adviser to begin the petition process.
- [Traveling Scholar Form](#)  
If a student would like to take advantage of special resources available on another campus but not available on the home campus; for example, special course offerings, research opportunities, unique laboratories and library collections, this form must be completed and approved.
